Vaccine-preventable viruses

- Hepatitis A: HAV
- Hepatitis B: HBV
- But not Hepatitis C: HCV
- Not Hepatitis E HEV

Vaccine-preventable viruses

- **Hepatitis A: HAV**
- **Hepatitis B: HBV**
- But not Hepatitis C: HCV
- Not Hepatitis E HEV

Hepatitis viruses in pregnant women: what should be remembered

- **Hepatitis A and B vaccination can be performed if required in the pregnant population**
- **Hepatitis E is more severe in pregnant women**
 - Increased risk of fulminant hepatitis, of maternal hemorrhages
 - Especially in the 3rd trimester
 - Increased risk of poor fetal outcome : fetal losses, prematurity
